DETAILED ACTION

Claim Rejections - 35 USC § 103

1. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

2. Claims 1-4 are rejected under 35 U.S.C. 103(a) as being unpatentable over Santa Cruz et al in view of Oskorep.

Santa Cruz discloses the use of a plectrum holder and plectrum, in the form of a ring (10) designed to be placed on the index finger of a user, the ring comprising securing means designed to hold the plectrum against its outer surface, characterized in that the securing means comprises a flat magnetic surface (38) against which the plectrum (12) is positioned.

Santa Cruz does not disclose the specific use of a conductive section on the plectrum.

Oskorep discloses the use of a plectrum itself made from a conductive metal section, designed to cooperate with the magnetic surface (see paragraph 23).

It would have been obvious to one of ordinary skill in the art at the time the invention was made to modify the ring device as disclosed by Santa Cruz to include the metal plectrum as disclosed by Oskorep in order to convenient means support pick.
